

## Bright Green Matrix LED Channel Modules

# Bright Green Matrix - LED Channel Modules

**Bright Green Matrix LED channel letter modules are a tough, bright and energy efficient way to light sign letters.**

**Optimised for outdoor and graphic display, Bright Green LED systems replace conventional lighting technology and help you save money, save energy and save carbon.**

Building on more than 10 years industry experience, our systems are a breakthrough in affordability whilst retaining all the benefits of solid state lighting - low energy, low carbon and low maintenance. A typical installation returns the capital investment within 2 to 3 years and reduces the lifetime cost by at least 50%. In fact, a Bright Green installation usually pays for itself through energy savings alone.

Bright Green Matrix LED channel letter modules are built to last. Using premium specification, high lumen LEDs and with an aluminium casing, they can be installed in the toughest environments.

As well as paying for itself through energy saving, a Bright Green LED system will reduce maintenance costs, improve display quality and help you reach your carbon reduction targets.

## Product Range

Code	LEDs	Size (mm)	Colour	Voltage	Lumens	Power
MC-2W	2	56 x 10	White	12V	27.0	0.72W
MC-2B	2	56 x 10	Blue	12V	2.2	0.72W
MC-2R	2	56 x 10	Red	12V	4.8	0.72W
MC-3W	3	67 x 10	White	12V	40.5	0.72W
MC-3B	3	67 x 10	Blue	12V	3.3	0.72W
MC-3R	3	67 x 10	Red	12V	7.2	0.72W

All modules are IP67 rated for use in tough, wet environments

## Carbon Savings

Of course, the savings are not just financial, there are big reductions in carbon generation too. Installing Bright Green LED modules into a typical sign will make a significant carbon saving over the lifetime, helping to meet your corporate environmental objectives. Also, as governments around the world introduce financial measures to limit emissions, taking action now is very likely to reduce your costs further in the future.
