

# LED | LIGHT PANEL

Lighter. Stronger  
Altogether brighter.

bright green.  
technology 

## The bright choice

LED Light Panel brings to your project the star quality of a top model: fashionably thin but also extremely bright.

Unlike a top model, it's almost zero maintenance and uses very little energy to keep it looking its best.

## Sky's the limit

There are scarcely any boundaries to how LED Light Panel can be put to use.

It comes in all sorts of colours, shapes and sizes. You can even ask us to bend it!

Your creativity just found its new best friend.

## We'll bend over backwards to get it right

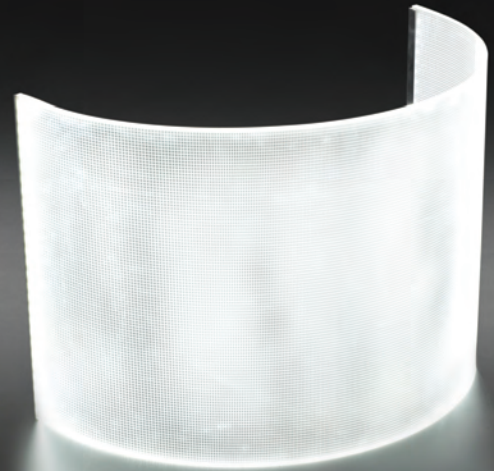

We don't deal in one-size-fits-all answers. We take the time to understand your business and experienced advice is always on hand.

We work with you to determine your real objectives then construct a package that meets them. Yes, we would say that. Put us to the test.

## Cost efficient

LED Light Panel doesn't cost any more in the long run than less enlightened alternatives: usually quite the opposite.

Our consultative approach saves our clients money, time and energy. Brighter all round.

## Beautiful indoors

Bars, reception desks, retail interiors, point-of-purchase – we've lit them all.

Each time our client has had a mood in mind.  
Each time LED Light Panel has been able to hit it exactly.

## Astounding outdoors

LED Light Panel performs brilliantly wherever it's deployed – often in the most out-there places.  
No stripes, just beautiful illumination.

We're used to extremely exacting clients  
for example advertising panels in  
the New York Subway.

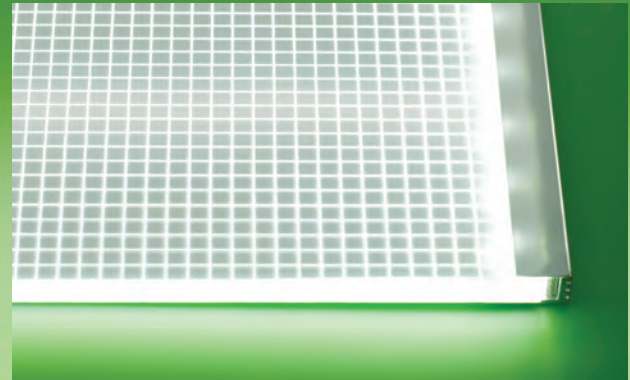

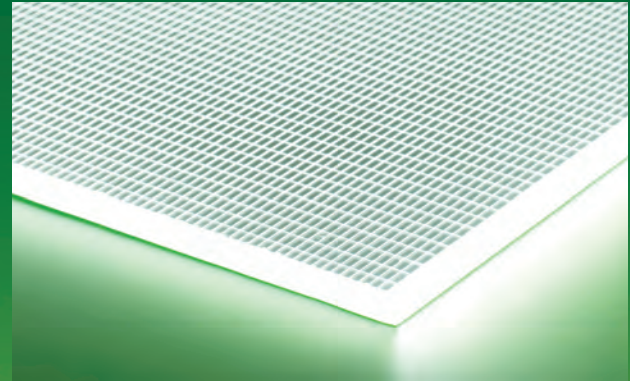

## Our promise

We are straightforward, open and clear about the balance between performance, specification and price. We always ensure that what we deliver is fit for purpose.

We work with our customers to fully understand the business case for a project and are always ready to adapt the product design to improve the performance.

## LED light panel

Every panel we produce is custom – optimised for the specification of the project and only made after we've understood what's needed.

Here are the production limits and design items to work within:

- No minimum quantities
- Delivery generally within 7/10 days
- An acrylic thickness of 5 to 8mm
- A maximum size of 2400 x 2000mm
- Cool/neutral/warm white, red, blue, green or RGB
- Dimming or DMX control
- A range of frame options and colours
- Custom shapes and bends

We'll also work with you to define the power supplies, connectors and accessories.

## Bright Green Technology

Bright Green Technology specialises in LED systems that dramatically improve on conventional lighting, driving down the energy cost, carbon footprint and associated maintenance burden.

We've worked in the most prestigious locations for the biggest companies and won their trust for our product quality and customer support.

We're UK based, privately owned, customer focused and passionate about lighting technology.

# Our Projects

Our LED Light Panel is installed in iconic locations worldwide  
- we've worked in the New York Subway, Dublin's LUAS tram system, the Great North Museum, Harrods and Goodwood Racecourse.

LUAS TRAM SYSTEM

NEW YORK SUBWAY

CENTRE OF THE CELL

COVENTRY CITY COUNCIL

HARRODS LONDON

GOODWOOD RACECOURSE
