

# Bright Green Wide Install Guide

## Components required

20 AWG wire

M3 screws

Bright Green Wide modules

Power supply

Wire connectors

## Layout

Determine the layout of your Bright Green Wide modules based on your overall sign dimensions and using the guidelines below. When you have decided on your layout, cut the modules where necessary. Use the fixing tape on the rear of the module to secure each module. Ensure the fixing surface is clean and dry before securing the modules. We would also recommend using a screw or rivet to secure modules periodically along the chain.

Recommended pitch per depth - Wide Angle (WM)

Recommended pitch per depth - Wide Angle Mini (WMM)

## Electrical connection

### Wide

The wide angle (WM) is sold in strings of 21 for the 3 LED sets and strings of 10 for the 1 LED sets .

The maximum run in series for the 3 LED set is 21 modules. Use another run in parallel to connect more.

The maximum run in series for the 1 LED set is 21 modules. Use another run in parallel to connect more.

The 1 LED set can be cut between any module in the string.

The 3 LED set must only be cut on the red and white wire every third module in the string.

### Mini Wide

The wide angle mini (WMM) is sold in strings of 30.

The maximum run in series for the Mini Wide is 30 modules. Use another run in parallel to connect more.

The Mini Wide can be cut between any module in the string.

Cap all unused wires.

## Power supply table

Example power supply configurations

Product code	Voltage	Max. Watts	Max number of Wide Angle Modules	Max. number of Mini Wide Angle Modules
PCV-1260	12V	60W	21	42
PCV-12100	12V	100W	35	71
MWH-V24C-AP	12V	240W	68	137
