

# LED Lighting for Retail Displays

Customised lighting & control for retail displays delivered quickly, accurately and reliably

The investment that we make in our engineering team is what sets us apart. It means we'll always have the best new products and innovations and you'll get straightforward, honest advice from an engineer.

Our in-house CAD and prototyping department takes the load off your own design team, whilst our new tool-kit approach to parts makes specifying and management faster and easier for your procurement team.

With a continued focus on product quality, we aim to eliminate faults and variations in performance from unit to unit, and our UK-based assembly ensures flexibility and reliable lead times.

An extensive range of LED lighting systems, assembled in the UK, can be customised quickly for all sizes of projects, from one-off displays and prototyping through to volume roll-outs.

As well as keeping a wide stock of standard LED products, we manufacture to order, from plug and play assemblies to smart control systems and are ready to work with you on every aspect of the design process.

We respond to enquiries in less than **24 hours**

Our normal delivery time for **prototype** custom assemblies, lightboxes or light panels is just **5-10 working days**

**Over 98%** of our retail lighting projects have been **delivered as per the agreed schedule**

**Over 70%** of our part are **custom or modified** parts & assemblies\*

We have a strong commitment to quality, **the percentage of faults/issues on delivery for our retail clients is less than 0.2%\***

And that's why our customers trust us, with **99%** of our retail clients purchasing from us more than once

\*based on our top 5 retail customers, data between 01/08/2016 - 6/11/2017
