

# Bright Green Duo

## Our new LED system specifically designed for double sided lightboxes

Bright Green Duo Modules have 6 lensed LEDs on either side of the module this means that only one string of modules needs to be installed into each double sided box.

### Applications

Signage – Large double sided lightboxes with depths greater than 500mm

Advertising – large format advertising

The wide beam angle allows for a wider module pitch so that fewer modules are needed for each project, reducing labour costs and installation time.
