

Services

Choosing the Bright Green PRO Range ensures leading edge lighting performance. The Services range offers options of design, planning and commissioning at every stage of the project

Lighting Control

Control system design – We're ready to help with every project from planning to complex project commissioning, working remotely or onsite

Commissioning & programming - Our expertise encompasses programming and specification of lighting control protocols such as DALI, DMX, WiFi, Bluetooth, Gooee and Casambi

Custom Assemblies

Engineering excellence – Our in-house engineering team will work with you from system design to installation. We can develop and build complete assemblies, delivered to your specification

Ongoing support - specifying the PRO Range guarantees our engineering support from start to finish
